

- ATTENTION ENVIRONMENTAL CONSULTANTS -
Register Your Firm or Update Your Listing
on the Army Corps of Engineers / Charleston District's
- Courtesy Lists Of Wetland & Stream Restoration Consultants -

The Army Corps of Engineers / Charleston District maintains a weblist of Environmental Consultants as a courtesy reference for the general public. If you or your firm wishes to be included in the Charleston District's *Wetland Consultants* or *Stream Restoration Consultants* List, please complete this .pdf-format list and send it to the District HQ by the .pdf-Adobe email link on the form toolbar. Please keep "SAC Consultant List Submittal" in the reply line.

There is no charge for listing your company. Bear in mind that inclusion on these lists should not be considered an endorsement of ability or reputation, does not require professional certification and should not be represented as such to the public. The Corps Regulatory Program does not "approve" or endorse environmental professionals. This list is posted as a convenient reference for permit applicants and will be updated with your submittals periodically.

Also keep in mind that the Charleston District federal regulatory authority includes all of South Carolina, and people seeking help with permits are typically South Carolina citizens or property holders.

If you have questions, please call Paul Hinchcliff at 843/329-8044.
